- ☐ Constraint Errors in compilation output
- ☒ Testing is not executing
- ☒ Swiftlint not running correctly:

SourceKittenFramework/library_wrapper.swift:31: Fatal error:
Loading sourcekitd.framework/Versions/A/sourcekitd failed

corrected using:

xcode-select -s /Applications/Xcode.app/Contents/Developer/

lint.txt

11/21/21 9:18 AM

- ☒ CoreData test error.

```
let request = NSFetchRequest<Project>(entityName: "Project")
let projects = try managedObjectContext.fetch(request)
```

```
dataController.delete(projects[0])
```

```
XCTAssertEqual(dataController.count(for:  
Project.fetchRequest()), 4)
```

```
XCTAssertEqual(dataController.count(for: Item.fetchRequest()  
40) (Error)
```

Cascade not set on Items

Rebased remote to resolve xcode error

11/23/21 10:14 AM

- ☐ Closed tab showing 'Open' in tab menu
- ☒ Titles missing from Open and Closed tabs
- ☐ CoreData not being deleted upon Debug startup
- ☐ Jazzy error upon installation

Done linting! Found 134 violations, 6 serious in 27 files.

Rules can be disabled with a comment inside a source file with the following format:

```
// swiftlint:disable <rule1> [<rule2> <rule3>...]
```

The rules will be disabled until the end of the file or until the lint

—

—

the

er

The rules will be disabled until the end of the file or until the lint sees a matching enable comment:

```
// swiftlint:disable <rule1> [<rule2> <rule3>...]
```

☐ Custom sort dialog not showing
